

DERMATOLOGY WORKFLOW

The practice of dermatology is evolving with the integration of new technologies, high-powered lasers and more complex outpatient procedures. In order to meet these evolving needs, Midmark has reengineered the concept of the dermatology room to combine consultation, counseling and procedures all within a seamlessly efficient yet warm, inviting atmosphere designed to enhance the caregiver-patient relationship.

DERMATOLOGY WORKFLOW H ←

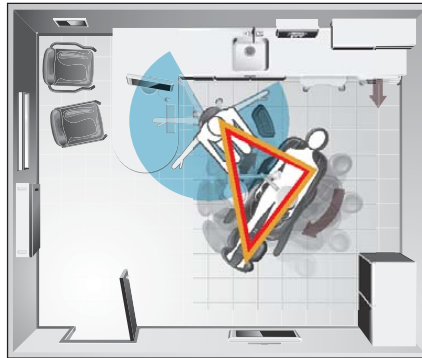

The dermatology room is a 12 ft. x 14 ft. space with a storage system occupying one wall. The consultation and family/visitor zone is created through an extended work surface as support for a large interactive display panel that can be shared between physician and patient.

The storage zone includes a work surface area, lower and upper cabinets, and mobile supply carts for additional flexibility.

The adjustability and rotation of the procedure table will bring the patient to the caregiver, optimizing the efficiency of access to the patient and reach to instruments and supplies.

Most importantly, ease of adjustability of the procedure table allows the caregiver to optimize the position of the patient – creating options that would not be possible with a typical exam table.

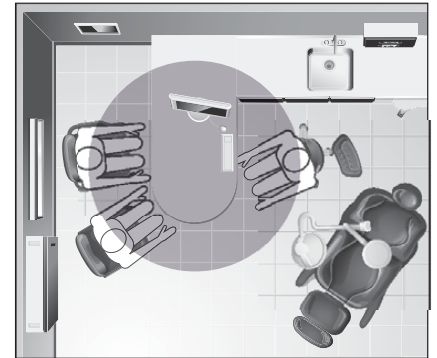

A ceiling-mounted procedure light is installed above the procedure table and provides optimum visual clarity during the procedure.

Enhanced Ergonomics

Enhanced ergonomic design helps divide the room into consultation and procedure zones with the interactive data terminal.

Before the start of the procedure, the treatment room is well-organized, minimizing visual clutter while reducing patient anxiety. This is supported by ample storage along one wall with a vertical storage unit for larger equipment.

Consultation Zone

The consultation zone is designed around shared communication between caregiver and the patient and guest.

A large interactive screen makes information readily accessible, creating a more intimate dialogue between patient and caregiver and bringing needed educational information into the procedure room. The walls surrounding the family visitor zone have displays for related care products.

Midmark is an ISO 13485 and ISO 9001 Certified Company
